

Teacher CPD

Mechanisms and STEM for KS1 and 2

Mechanisms and STEM at work for KS2 and 3 with strong links to

- ✓ Science
- ✓ Design Technology
- ✓ Maths

Delivered by UKSTEM in partnership with Redfern Education this Planet Maths course is based on using a range of low cost materials to both explore and use structures and mechanisms with a focus on putting maths in context.

- How to support your pupils in creating successful mechanical projects with movement. Automatas that use linkages, cams, pulleys and gears.
- Developing their maths and science.

You will carry out all the practical activities and leave the course with the technical knowledge necessary to continue to develop mechanical projects in your school.

Price includes

- Copy of course notes
- All resources and links to ongoing development of ideas.
